

“ Like any other company, WDP has a social obligation. As a leading property partner for the logistics sector, which has a major impact on prosperity and the environment, we are fully aware of our responsibility. That is why sustainable entrepreneurship has been a key pillar in the WDP strategy for many years.

The United Nations has drawn up Sustainable Development Goals for the period 2016-30. They are promoted as the global goals for sustainable development. WDP has used these goals as a guideline to create a concrete working framework in which seven focus themes have been defined that will help our company maintain sustainable employment practices and sustainable management in the future. This analysis will form the basis for a long-term roadmap that will be formulated in the near future. In our opinion, we are able to make a contribution to several of these goals: the use of sustainable energy, employment and economic growth, the battle against climate change, etc. These are all aspects on which WDP can have a direct or indirect influence.

WDP also has social responsibility at corporate level. These two levels – global and local – cannot be separated. A corporate strategy based on sustainable development implies future-proofing our company and its stakeholders.

Contributing to a more sustainable and better world is of course only possible when everyone within the company believes in this vision, and is supported in this respect by the management and the Board of Directors. Only then sustainability remains embedded in WDP's DNA. ”
